

# MAXWELL

1917—"THE WONDER CAR"—\$595

Absolutely complete with Electric Starter and Electric Lights. An improved Car at a Lower Price.

## The New Price

The most amazing fact about the 1917 Maxwell is the new price, \$595 which is \$60 less than the price of the 1916 Maxwell car, and this price includes everything: electric starter, electric lights, every modern feature, every refinement.

## THE MAXWELL,

### The Lowest "After Cost" Car

The Maxwell earned a victory over 40 other cars in an impartial test made by the Yale University, Sheffield Scientific School. In the test made by the Yale professors, the Maxwell averaged 33.2 miles to a gallon of gasoline at 19.8 miles an hour, with a correspondingly low record for consumption of lubricating oil.

Its light weight, and the increased efficiency of the 1917 Maxwell result in making the Maxwell the record car for low "after cost."

Everyone knows that the Maxwell is one of the easiest cars on tires.

It is not at all unusual for Maxwell owners to run more than a year without replacing tires. The tire equipment is 30 x 3 1-2 inch on all four wheels. The light weight of the Maxwell makes this size sufficient to give exceptionally long mileage from each set of tires. A famous make of anti-skid tires are supplied on the rear wheels.

## The Maxwell

has lowered all economy records for: (1st) Miles per set of tires. (2nd) Miles per Gallon of Gasoline. (3rd) Miles per quart of Lubricating Oil. (4th) Lowest year-in-and-year-out repair bills.

## BRIDGE EQUIPMENT NOW SUFFICIENT

Sufficient Pontoon Bridges to Cross Rio Grande into Mexico Are Now Available to Patrol.

(By Associated Press.)

Brownsville, Texas, August 1.—Sufficient pontoon bridges to cross the Rio Grande into Mexico at any stage

of the river, from lowest tide to flood crest have arrived at Fort Brown. They are now a part of the "invasion" equipment of the soldiers in the Brownsville district of the border patrol.

The pontoon bridge-system is comprised of boat units, each mounted on heavy wagon wheels, ready for immediate transportation, carrying everything, including flooring for instant use.

Each important point on the border it is understood here has been, or will be equipped with full pontoon

equipment for crossing the river, should the international bridge not be available.
